

Snow blower

**Facts and technical data on the snow blower
for the City Ranger 3070**

Effective snow removal

Enter wintertime - with ease of mind

When winter comes with its massive heaps of snow, a snow blower helps a great deal. The compact dimensions of the snow blower allow for clearing areas where manual labour would normally be the only option. The attachment works effortlessly on roads, paths, sidewalks, parking lots, etc.

Hydraulic and electrical adjustment of the discharge chute

The 2-step attachment works its way through snow drifts by scraping the snow together with the large auger and sending the snow wherever you want via the adjustable chute.

From the comfortable operator's seat, the operator has the option of continuously adjusting the direction of the chute with a joystick. When you want the snow to be blown higher or lower, this is also done continuously with a joystick in the cabin.

Snow-clearing for narrow passages

The snow blower effortlessly handles 70 cm high snow drifts with a working width of 130 cm and blows the snow away with great force. The snow is blown high over hedges or other obstacles - far away from people and vehicles. Clearing snow on narrow sidewalks, biking paths, or other areas with limited space, is no problem. The compact dimensions and high manoeuvrability of the articulated City Ranger 3070, as well as the width of the snow blower, allow it to enter even the narrowest of passages. The 2-step snow blower slides on adjustable skids and can therefore be adapted to any surface. In demanding conditions, the 4-wheel drive of the City Ranger 3070 ensures great traction.

Attachment change in less than 1 minute

With Quick-shift, all City Ranger 3070 attachments can be replaced by a single person in less than 1 minute - requiring no hand tools or any heavy lifting. The snow blower is picked up by the machine, the handle is turned, and all mechanical and hydraulic systems are connected at once, so you can get back to work. If a salt and sand spreader is fitted to the back of the City Ranger 3070, you can do two jobs at once. The salt and sand spreader is just as easy to install.

The Quick-shift makes it easy and quick to switch from one attachment to another, and the utility machine can be used for multiple types of jobs throughout the day. The easy attachment change on the City Ranger 3070 has several advantages: Efficient operation, increased safety, and a much better return on investment.

Specialized quality attachment for harsh conditions

The need that arises in harsh weather conditions are reflected in the quality of the snow blower, delivering both an effective and specialized effort. The snow blower was produced in close cooperation with the Italian producer Cerruti Srl.

Cerruti was founded in 1958 and is dedicated to designing and producing snow blowers for both large and small machines. Tailored to the City Ranger 3070, the snow blower is a solid piece of craftsmanship developed and tested in the perfect conditions close to the Italian snow-covered Olympic Mountains. Local Italian quality components are mainly used for production.

Easy and effortless snow removal

Combined with the City Ranger 3070's substantial horsepower, the snow blower ensures easy and effortless clearing of large masses of snow.

Snow blower

- City Ranger 3070

Standard equipment:

Hydraulic adjustment of the chute	The vertical and horizontal direction of the chute is hydraulically adjusted via the joystick from inside the cabin.
Safety feature	In case of clogging, the in-take of the machine is equipped with spring bolts to protect it from over-stress.
Adjustable weight distribution	For optimum functionality as well as minimum wear of the attachment.
Skid	The 2 skids are height adjustable to ensure that the blade adjusts to surface variations.
Blade	The snow blower has a replaceable blade.

Extra equipment (options):

Tyres 235/60 R 16 (M+S)	The wide tyres are also suitable for winter service. They also have an M+S identifier (snowflake), but generate less ground pressure.
Tyres 195/70 R 15 (M+S)	When using snow chains, we recommend 15" tyres. Like the 16" wheels, these tyres also have an M+S code and are suitable for winter service use.
Anti-corrosion treatment	The anti-corrosion treatment will extend the life of the attachment.

Technical specifications

Dimensions		
Length	mm	4700
Width	mm	1330
Height / with beacon	mm	2300 / 2300
Storage dimensions		
Length	mm	1120
Width	mm	1330
Height	mm	1800
Weights		
Weight (snow blower)	kg	285
Performance		
Clearing width	mm	1300
Feed intake height	mm	700
Ground clearance below snow blower	mm	390
Auger diameter	mm	400
Blower diameter	mm	400
Axle revolutions	rpm	0-1100
Operating speed	km/h	1-7
Noise emissions		
Sound power level LwA (2000/14/EC and DIN EN ISO 3744)	dB(A)	106
CE certified according to EU directive		

Honest Work.

Egholm A/S develops, produces and markets utility machines that keep roads, parks and outdoor areas clean and inviting all year round. We supply functional quality machines and attachments to people who do an honest day's work keeping our cities clean and attractive. With special attachments developed for the machines, Egholm machines deliver perfect results no matter the task at hand. Built by craftsmen in Denmark, Egholm machines are in operation in cities and parks all over the world.

Honest Machines.

Egholm utility machines are developed by people who are passionate about technology and innovation. We listen to the people driving, using and servicing Egholm machines, because they are the true experts. It is our mission to design, build and market utility machines that deliver perfect results in real life. Egholm machines are honest machines - not just because they deliver comfort, safety and strong end results: They are also a sound investment for years to come and give you outstanding return on your investment.

Honest People.

We want you to think of us as your partner in every single way. And we always insist on reliability, trust and honesty in our partnership with you and with our network of dealers and service partners. We are straightforward and direct in our communication and in our dealings with everyone. Our belief in hard work and unwillingness to compromise helps us deliver the quality for which we are known. And we believe it is reflected by the machines we build for you, as well.
