

Suction sweeper

- Park Ranger 2155e

Standard equipment:

Hopper

As standard the hopper has a self-cleaning rotation filter system and a fresh water tank with 100 l capacity.

Front brush unit - 2 or 3 brushes

Consists of 2 front brushes and a suction mouth or 2 front brushes, 1 side brush and a suction mouth. Each brush is equipped with a water sprayer to prevent dust spreading while the unit is working. The suction mouth is designed with few mechanical parts for lower operation and maintenance costs.

The side brush extends the sweeping width to 1660 mm and is perfect for sweeping in corners, under benches etc. With the side brush sweeping is possible at two levels: while the two front brushes sweep the road, the side brush can sweep the pavement or a higher stair step.

If the side brush is needed, this is a factory mounted solution.

Height regulation

Nose wheel for height regulation of the front brushes for excellent sweeping result and minimal brush wear.

Hopper stand

Frame for easy fitting, removal and storage of the hopper.

Speed adjustment

Adjustable speed of the front brushes is standard.

Water meter

A water meter on the side of the hopper ensuring an excellent overview over water consumption and capacity.

Extra equipment (options):

External wander hose

The external suction hose is useful in areas that cannot be reached by the suction sweeper unit. With easy access, great mobility and excellent suction, cleaning can be done quickly around rubbish bins, under benches, on stairs or the like. The 6 m long hose is stored on top of the suction tank and is always ready for use. Specifications: 6 m x Ø150 mm.
